

1. Which bird call sounds like "Who cooks for you? Who cooks for you all" ?
  - a. barred owl
  - b. mourning dove
  - c. northern bobwhite
  - d. eastern cottontail
2. Prescribed burns should only be conducted when ...
  - a. danger of wildfire is low
  - b. under close supervision of a forestry or wildlife professional
  - c. neither a or b
  - d. both a and b
3. Which bird species prefers agricultural areas for feeding?
  - a. barred owl
  - b. mourning dove
  - c. northern bobwhite
  - d. none of the above
4. Excluding \_\_\_\_\_ from riparian areas can help reduce siltation, turbidity, and stream bank erosion.
  - a. white-tailed deer
  - b. wood duck
  - c. livestock
  - d. domestic dogs
5. Which species is the most prolific breeder?
  - a. gopher tortoise
  - b. eastern cottontail
  - c. white-tailed deer
  - d. eastern fox squirrel
6. What management practice is not recommended for white-tailed deer?
  - a. conservation easements
  - b. edge feathering
  - c. plant food plots
  - d. forest management

7. Which fish species thrives in a variety of conditions ranging from freshwater lakes, ponds, and streams to slow-moving streams to brackish waters of coastal areas?
  - a. bluegill
  - b. largemouth bass
  - c. neither a or b
  - d. both a and b
  
8. Largemouth bass require the water pH to range between \_\_\_\_ and 9.0.
  - a. 2.5
  - b. 4.5
  - c. 6.5
  - d. 8.5
  
9. Which of the following grasses or forbs are not native to Georgia and, therefore, are not beneficial to wildlife?
  - a. bermudagrass and bahiagrass
  - b. lespedezas and ragweed
  - c. pokeweed and paspalums
  - d. wiregrass and povertygrass
  
10. What is an appropriate fish survey technique for large-mouth bass?
  - a. fishing records
  - b. seining
  - c. electroshocking
  - d. all of the above
  
11. Which species may require exclusion from buildings as a form of wildlife damage management?
  - a. mourning dove
  - b. white-tailed deer
  - c. eastern fox squirrel
  - d. eastern cottontail
  
12. What is most often required to control nonnative invasive species?
  - a. hand-pulling
  - b. mowing
  - c. herbicide application
  - d. climate change
  
13. Standing dead trees are called \_\_\_\_\_.
  - a. snags
  - b. violins
  - c. old forests
  - d. cavities

14. When applying edge feathering, trees are usually thinned. How far into the forest are they thinned?
- less than 50 feet
  - 50 - 100 feet
  - 100 - 300 feet
  - more than 300 feet
15. What species is a ruminant?
- eastern fox squirrel
  - eastern cottontail
  - white-tailed deer
  - bluegill
16. Which plant succession stage does planting native grasses and forbs represent?
- 1
  - 2
  - 3
  - 4
17. Which is not a wildlife management practices option for migratory species?
- plant food plot
  - increase harvest
  - create snags
  - conservation easement
18. What is a wildlife survey that involves listening at a specific location for animal calls?
- roadside counts
  - harvest trends
  - transects
  - call counts
19. What management practice is designed to create permanent water for fish?
- water developments for wildlife
  - construct fish pond
  - control aquatic vegetation
  - repair spillway/levee
20. What species of tree has been decimated in the Southeast Mixed and Outer Coastal Plain ecoregion due to fire suppression?
- loblolly pine
  - laurel oak
  - American beech
  - longleaf pine

21. A behavioral term that describes primary activity near dawn or dusk is called
- ephemeral
  - crepuscular
  - catadromous
  - senescent
22. What is the word that is described by stinking, rotting flesh?
- fungi
  - tubers
  - soft mass
  - carrion
23. What is the term that describes the "frequency of occurrence of different vegetation types?"
- edge
  - arrangement
  - vertical structure
  - interspersions
24. What is the most important game animal in North America?
- northern bobwhite
  - eastern fox squirrel
  - eastern cottontail
  - white-tailed deer
25. Which of the following birds nest on the ground?
- barred owl
  - northern bobwhite
  - mourning dove
  - northern cardinal
26. What is a tree species that sheds its leaves each year?
- perennial
  - annual
  - deciduous
  - cacti
27. Which of these actions is not an appropriate management action for the barred owl?
- planting shrubs
  - control nonnative invasive vegetation
  - create snags
  - wildlife damage management

28. Reducing tree density in woods adjacent to fields is called:
- field borders
  - conservation easement
  - group selection
  - edge feathering
29. Which bird species requires freestanding water daily?
- mourning dove
  - barred owl
  - northern bobwhite
  - all require freestanding water daily
30. Which of the following are characteristics of the first successional stage?
- pinus
  - annual grasses and forbs
  - shrubs
  - perennial grasses and forbs
31. Which of the following influences the plants in a community?
- climate
  - soils
  - disturbance events
  - all of the above
32. Which species is considered a shrubland obligate?
- eastern fox squirrel
  - white-tail deer
  - northern bobwhite
  - eastern cottontail
33. Bluegill require that the water temperature reach at least \_\_\_\_ degrees during summer.
- 40
  - 50
  - 60
  - 70
