Watershed Journal Questions

1. Describe a watershed. In which watershed do you live in?
2. Name at least one human action that affects erosion within a watershed. How does this affect the water bodies within the watershed?
3. How does increased erosion affect the plants/animals living within the stream ecosystem?
4. Why does stream monitoring help us determine a watershed's health? Describe one measurement you took during stream monitoring and why it was important.
5. Explain how you can help keep your local watersheds healthy. How can your school? Your local community?
