# Find Your Partner

## Materials

- 1 set of cards - species with photos, food sources, or vocabulary

## Instructions

Each person will get one card. Participants will move around the room and find their “partner.” For example, the species’ name will match with the animal’s image, or the food source/vocabulary word will match its definition. Once all participants find their partner/match, have them orally share their answers with the entire group.

*Remember that not all species apply to Junior competitors. It is important to ensure that all distributed cards have matches. This works particularly well for larger groups but could be challenging for smaller groups. See other card games (memory, matching, verbal clues, etc.) for smaller groups.*
