

## Invertebrate Studies Journal Questions

1. Name three phylums you covered in class. For one of those phylums, describe what all the animals in the phylum had in common.
2. Name an arthropod you saw in class.
3. What is an example of an animal that uses stinging cells to capture its food?
4. Imagine there's a pie chart with all the animals in the world on it. Draw the pie chart, with one slice as big as all the invertebrates, another as big as all the vertebrates. Label which slice is the invertebrates, and which slice is the vertebrates.
5. Why are sponges considered to be the simplest of all animals?
