

## Invertebrate Studies Journal Questions

1. Name five of the phylums you covered in class. For two of those phylums, describe what all the animals in the phylum had in common.
2. What are chromatophores used for?
3. What is an example of an animal that uses stinging cells to capture its food?
4. What kingdom and phylum do humans belong to?
5. Draw a line to match the following and fill in the blanks. Example included.

Horseshoe Crab	Considered to be the _____ of all animals.
Sea Anemone	Sheds its shell. This is called _____
Sponge	Has only one shell, so it's called a <u>univalve</u>
Knobbed Whelk	Uses _____ cells to catch prey.

5. What kind of skeleton do arthropods have?
