

What is the range of annual precipitation in the Southeast Mixed and Outer Coastal Plain Forest ecoregion?

40 to 60 Inches

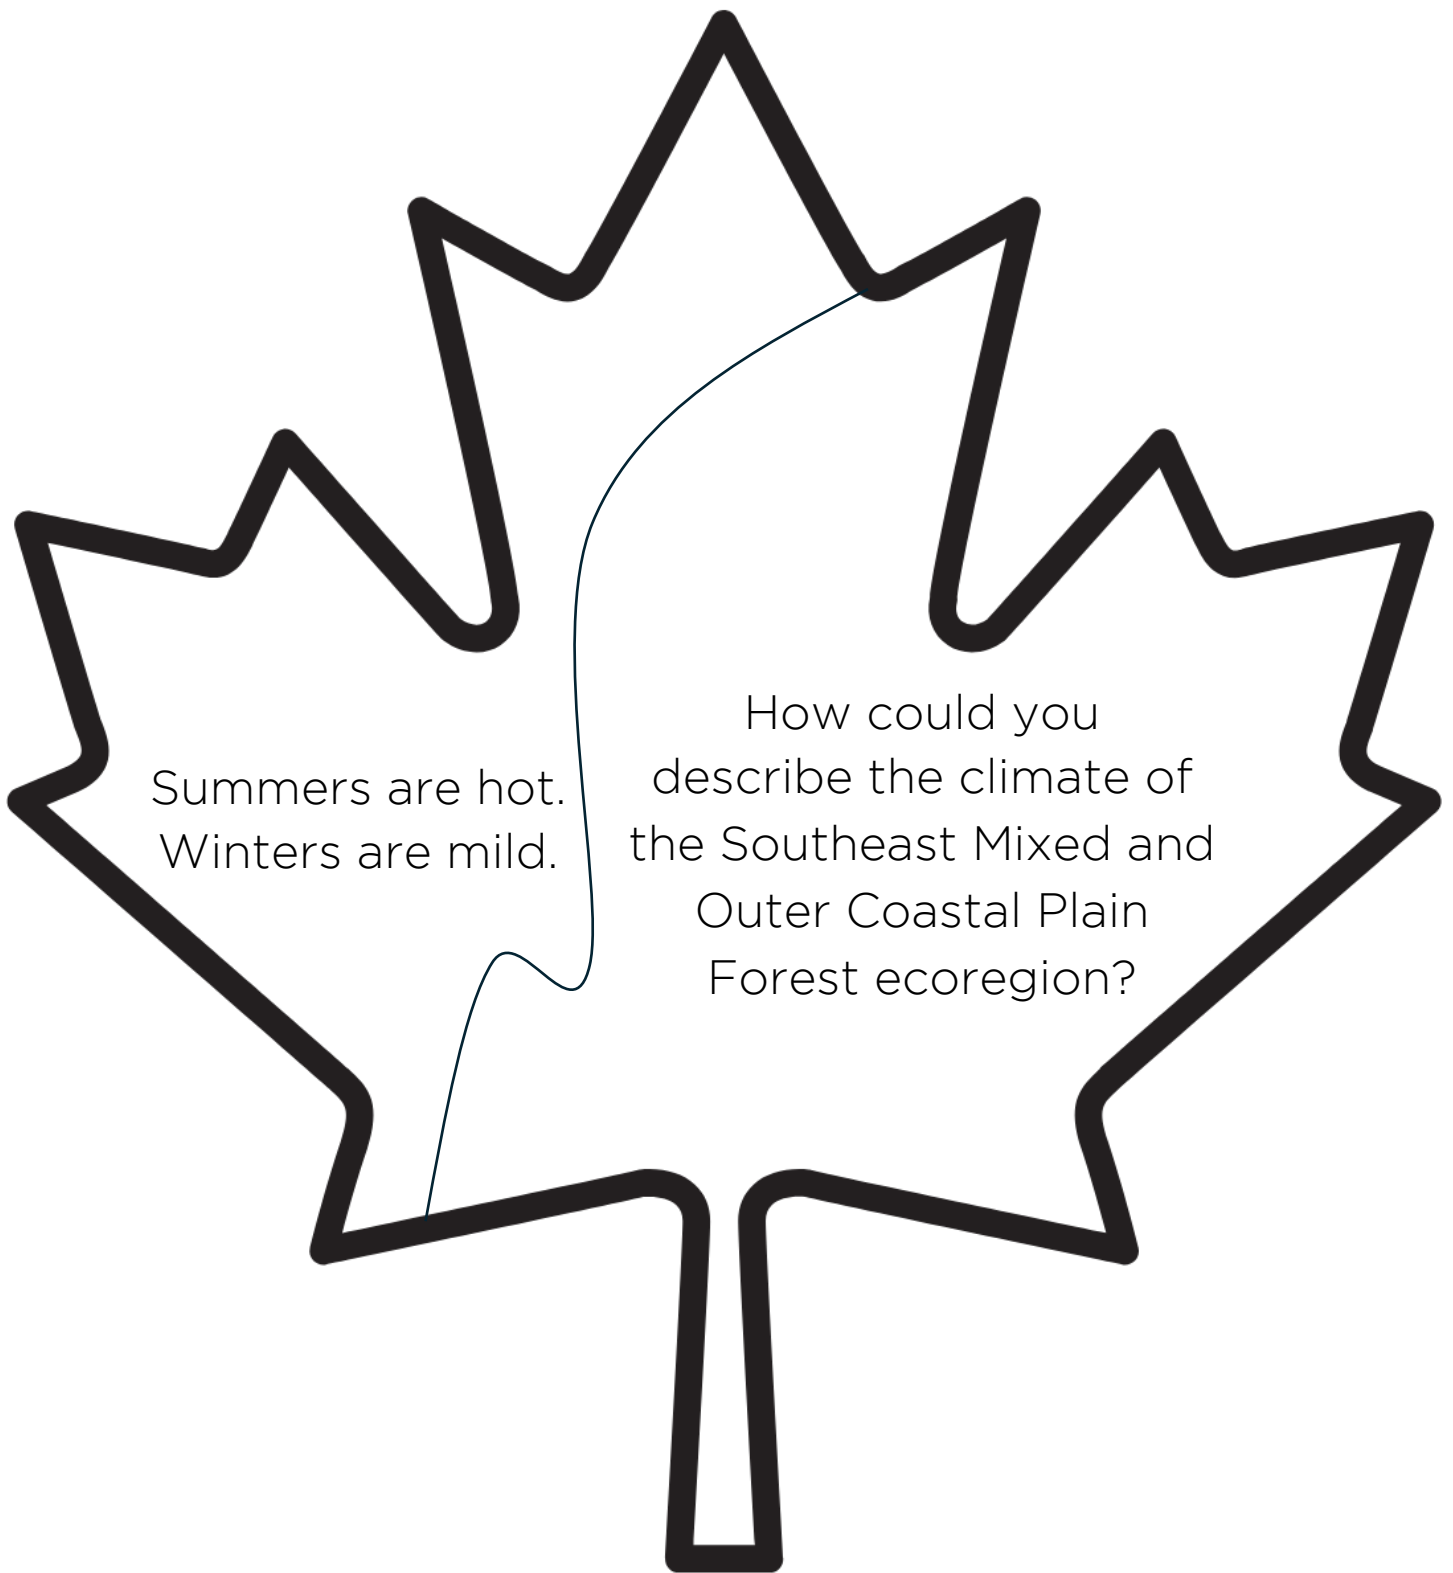

Answer on page 58

throughout
the year

When does it precipitate
in the Southeast Mixed
and Outer Coastal Plain
Forest?

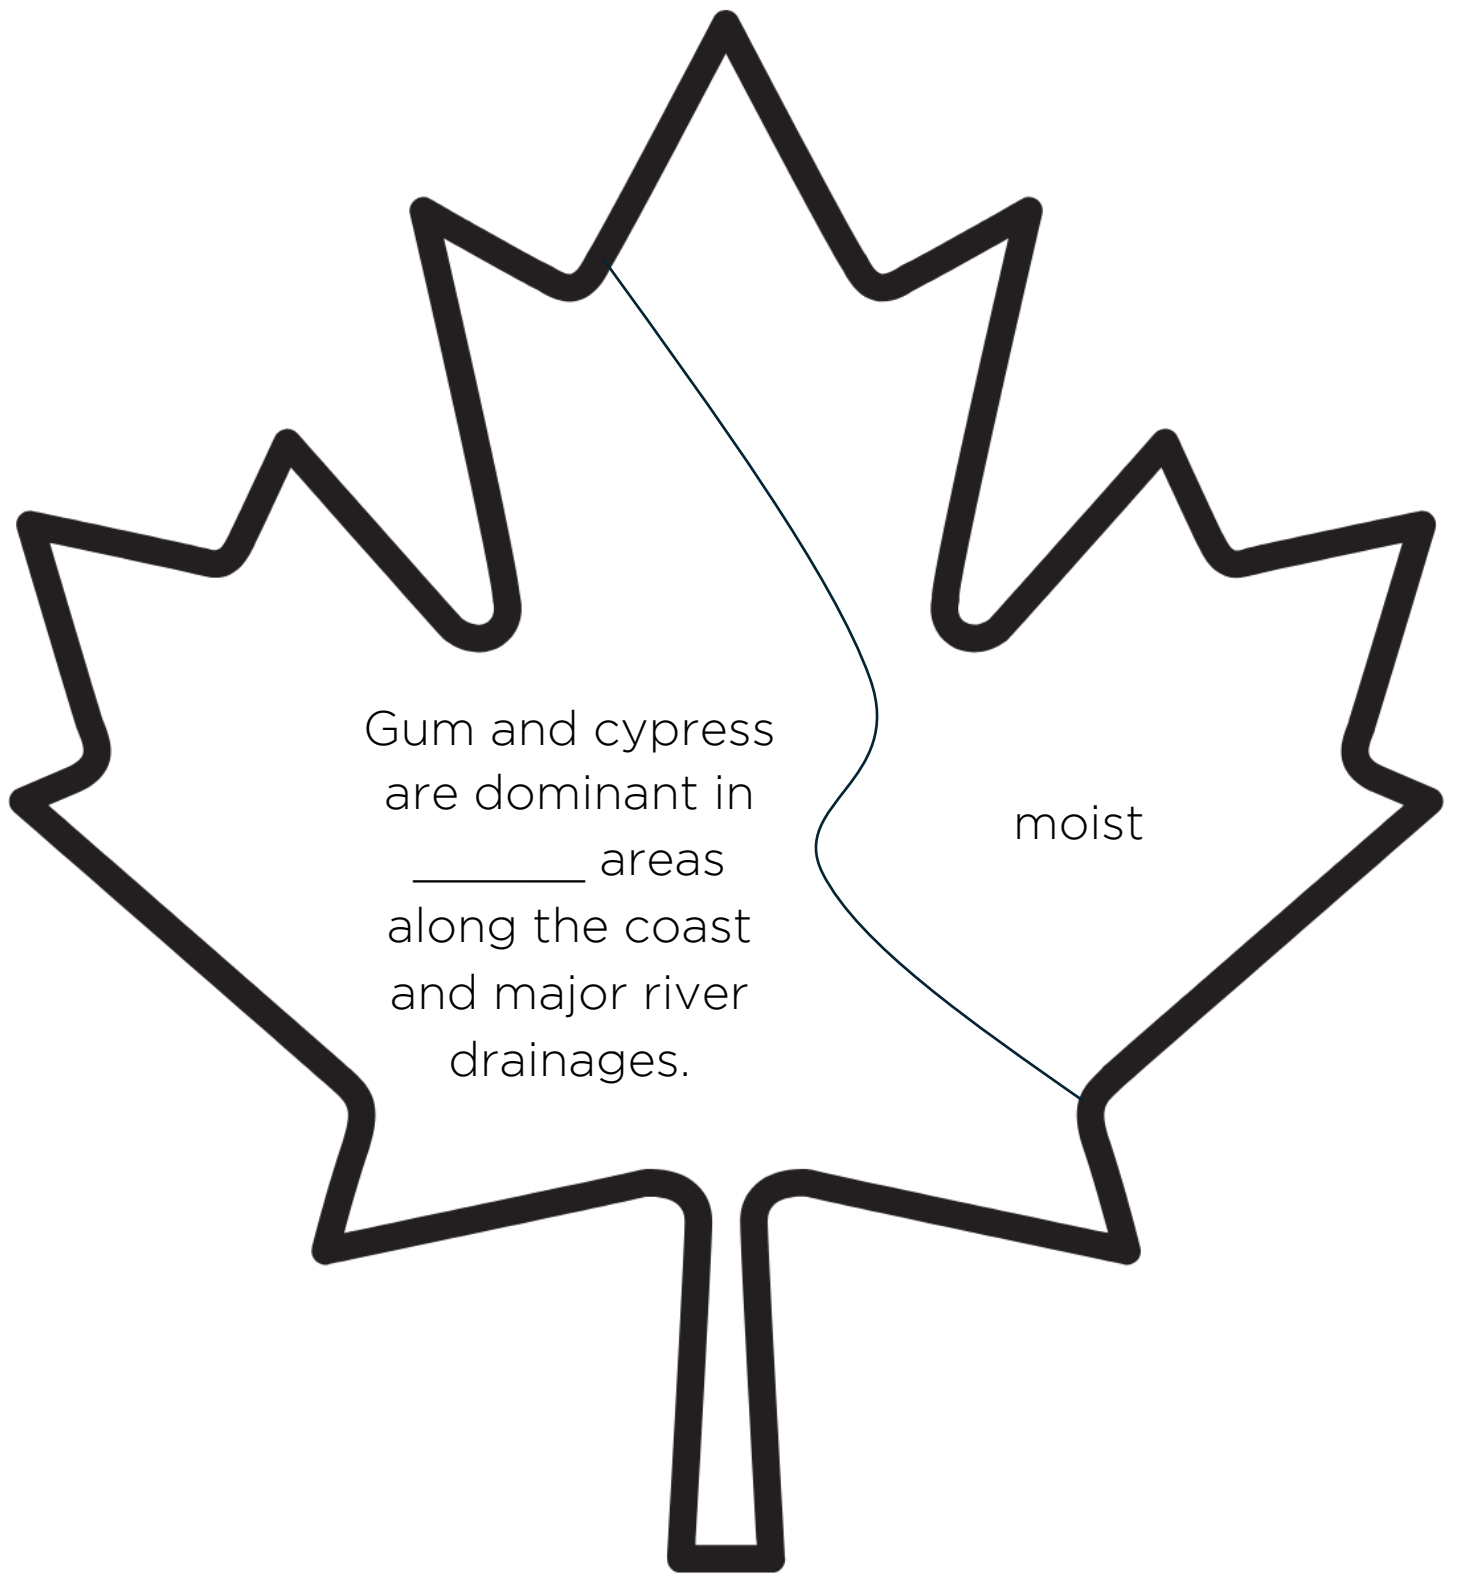

Answer on page 58

Summers are hot.
Winters are mild.

How could you
describe the climate of
the Southeast Mixed and
Outer Coastal Plain
Forest ecoregion?

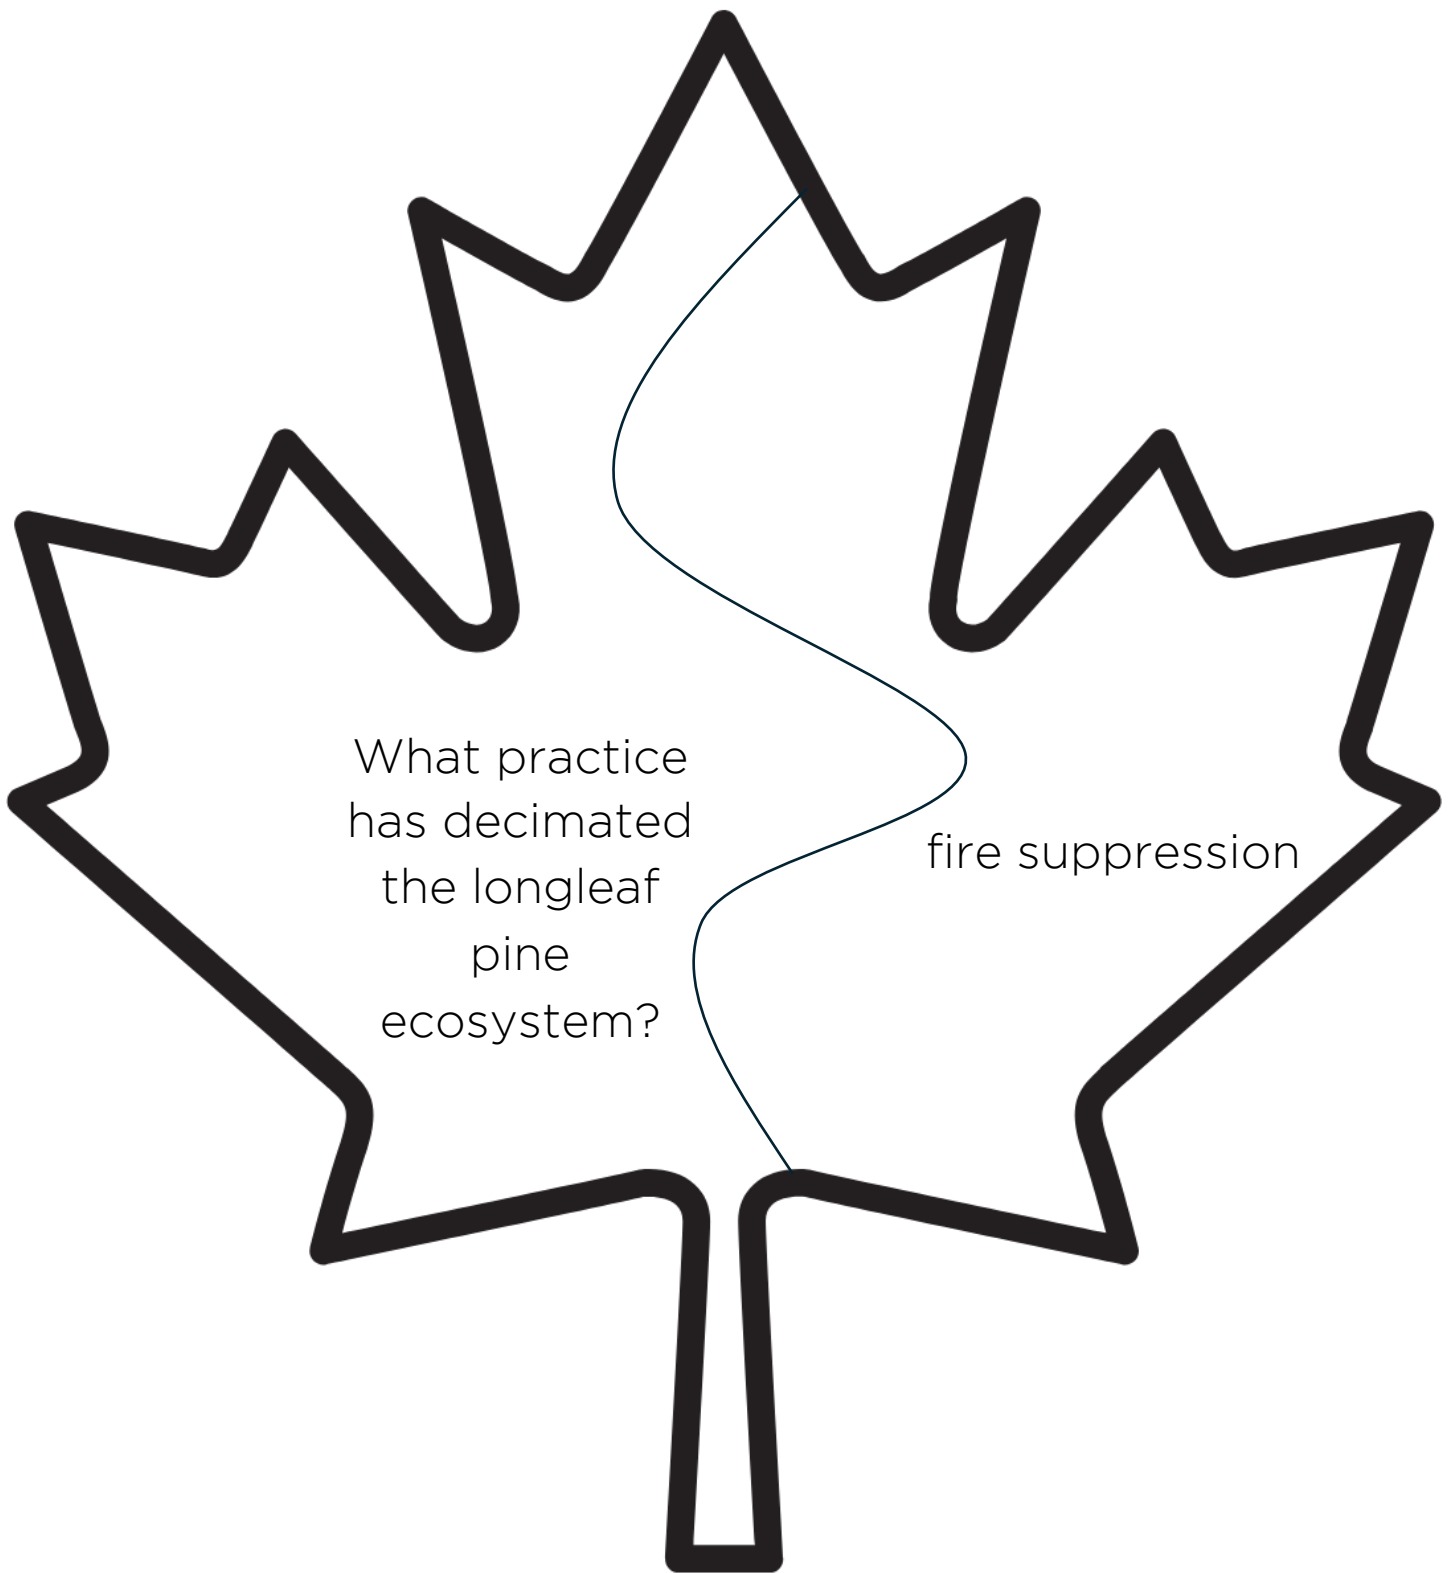

Answer on page 58

Gum and cypress
are dominant in
_____ areas
along the coast
and major river
drainages.

moist

Answer on page 58

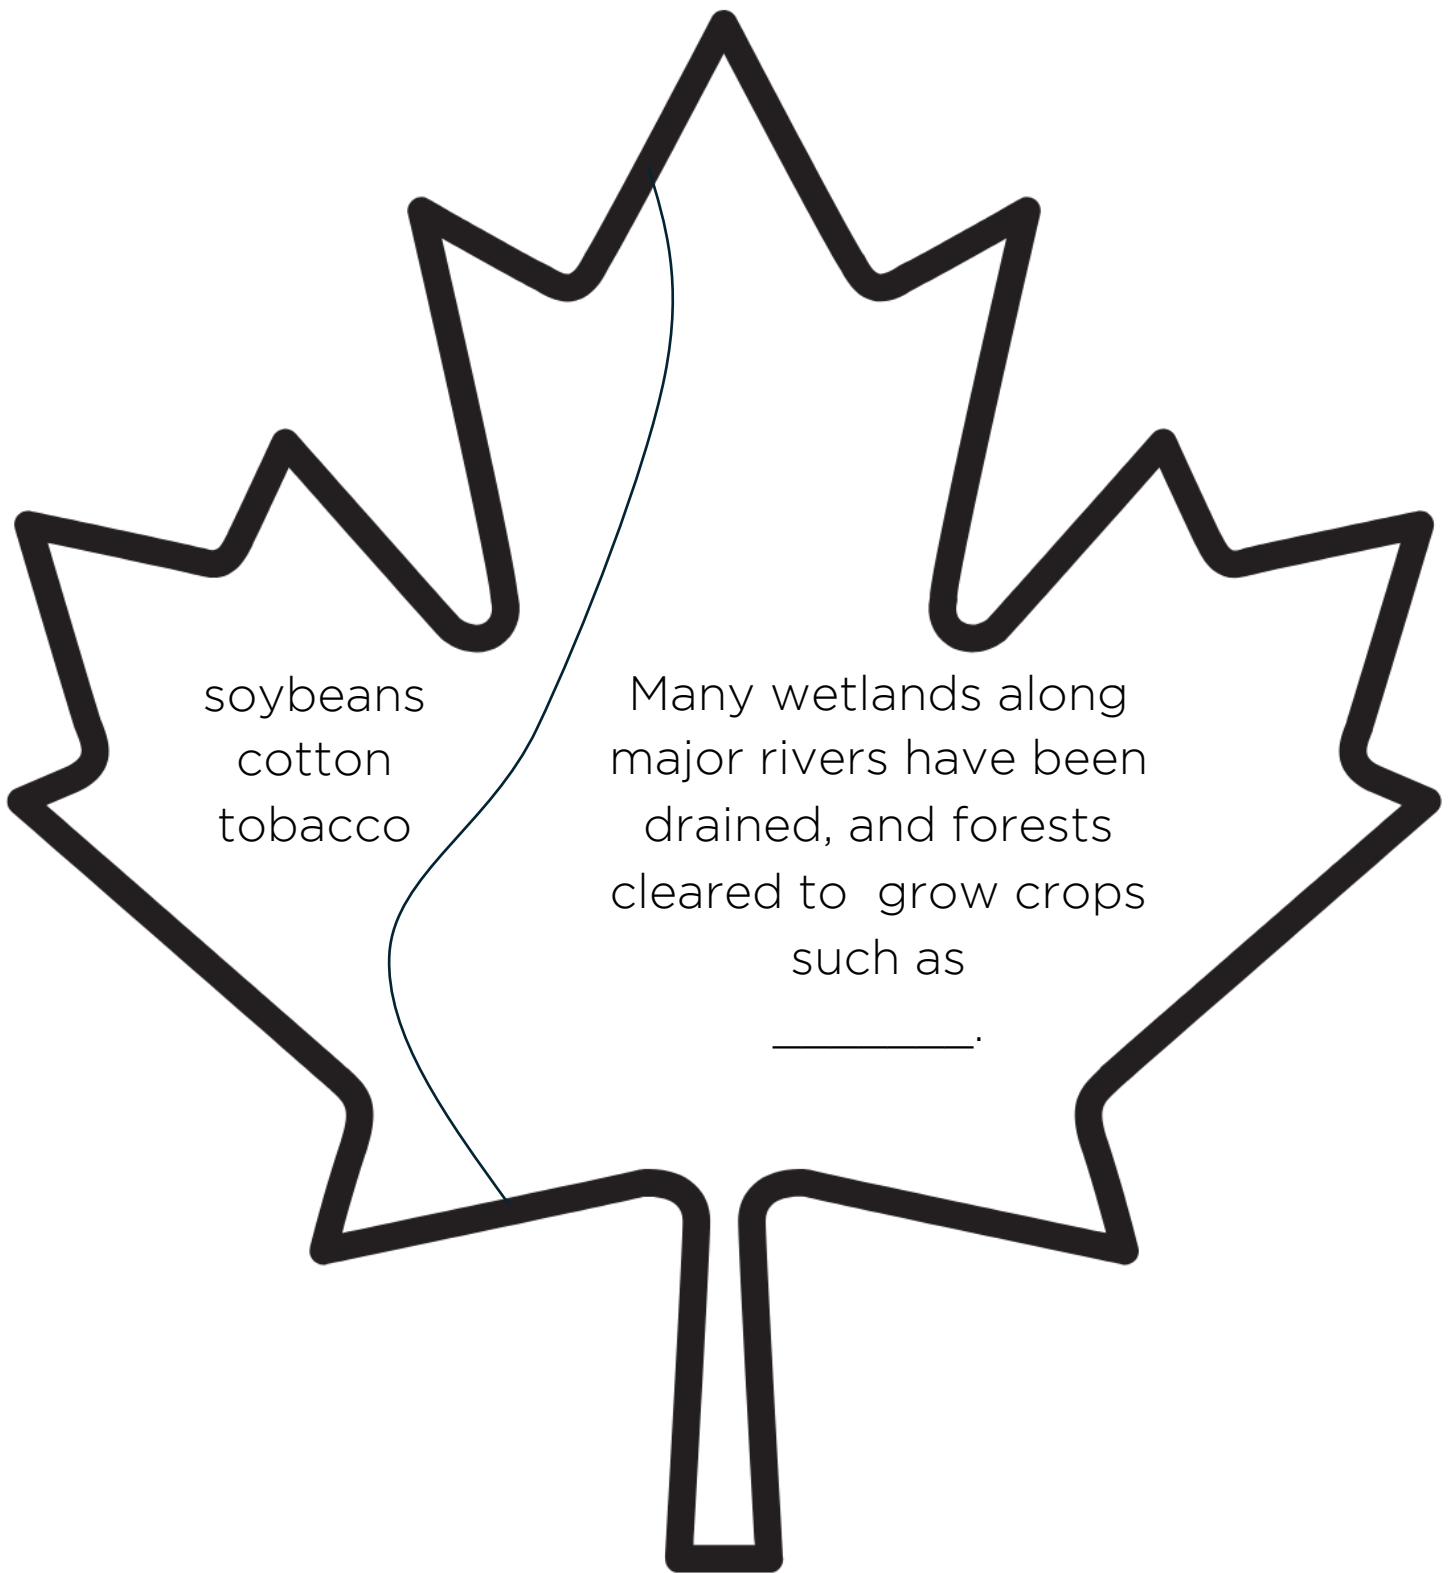

What practice
has decimated
the longleaf
pine
ecosystem?

fire suppression

Answer on page 58

Answer on page 58

soybeans
cotton
tobacco

Many wetlands along major rivers have been drained, and forests cleared to grow crops such as _____.

Answer on page 58

What is a typical
nonnative
invasive plants in
the Southeast
Mixed and Outer
Coastal Plain
ecoregion?

What are some of the trees featured in
the final stage of succession in the
Southeast Mixed and Outer Coastal Plain
ecoregion?

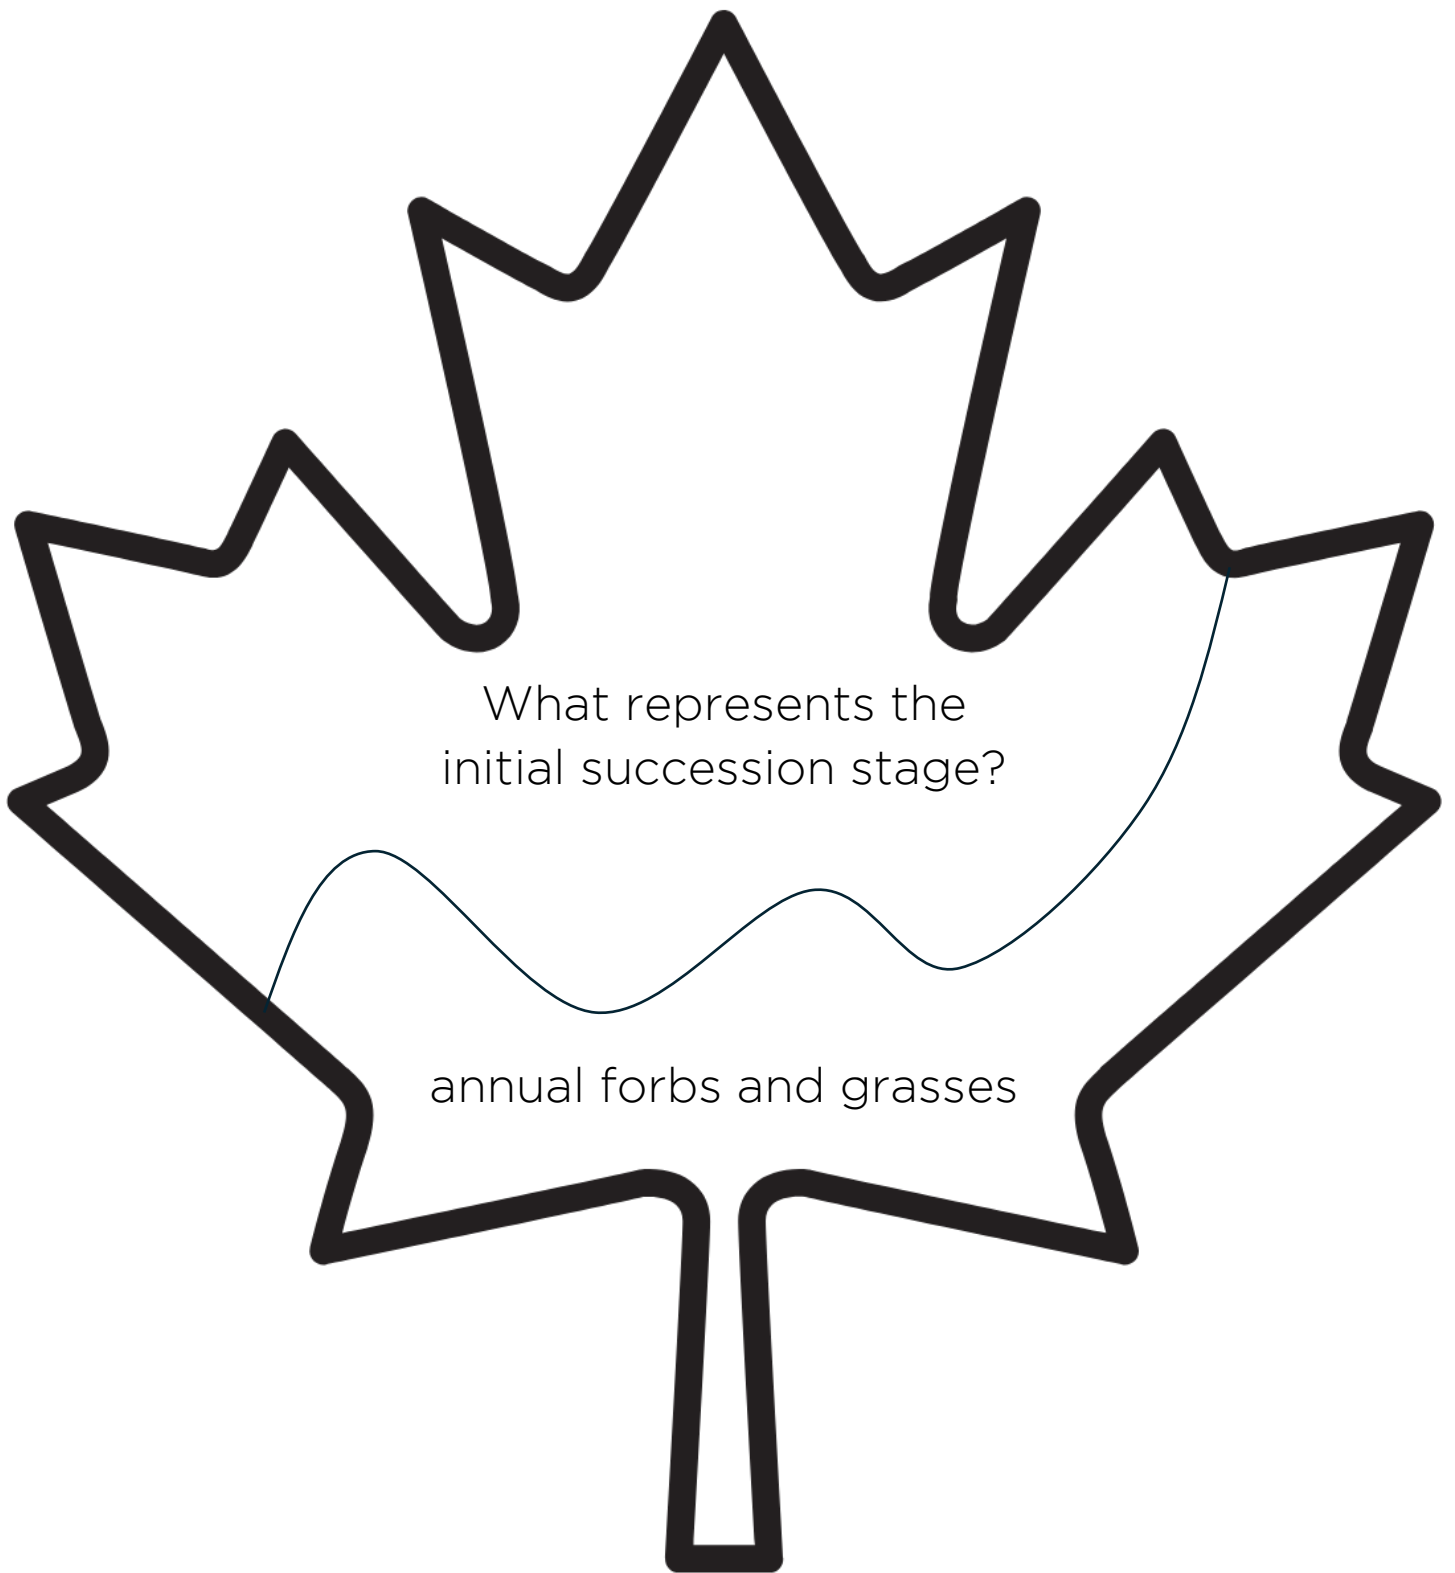

Answer on page 58

sumacs, viburnums,
elderberry, wild plum,
blueberry, blackberry,
hawthorns, and wax
myrtle

What are some
shrubs in the
Southeast Mixed
and Outer Coastal
Plain Forest
ecoregion?

Answer on page 58

What represents the
initial succession stage?

annual forbs and grasses

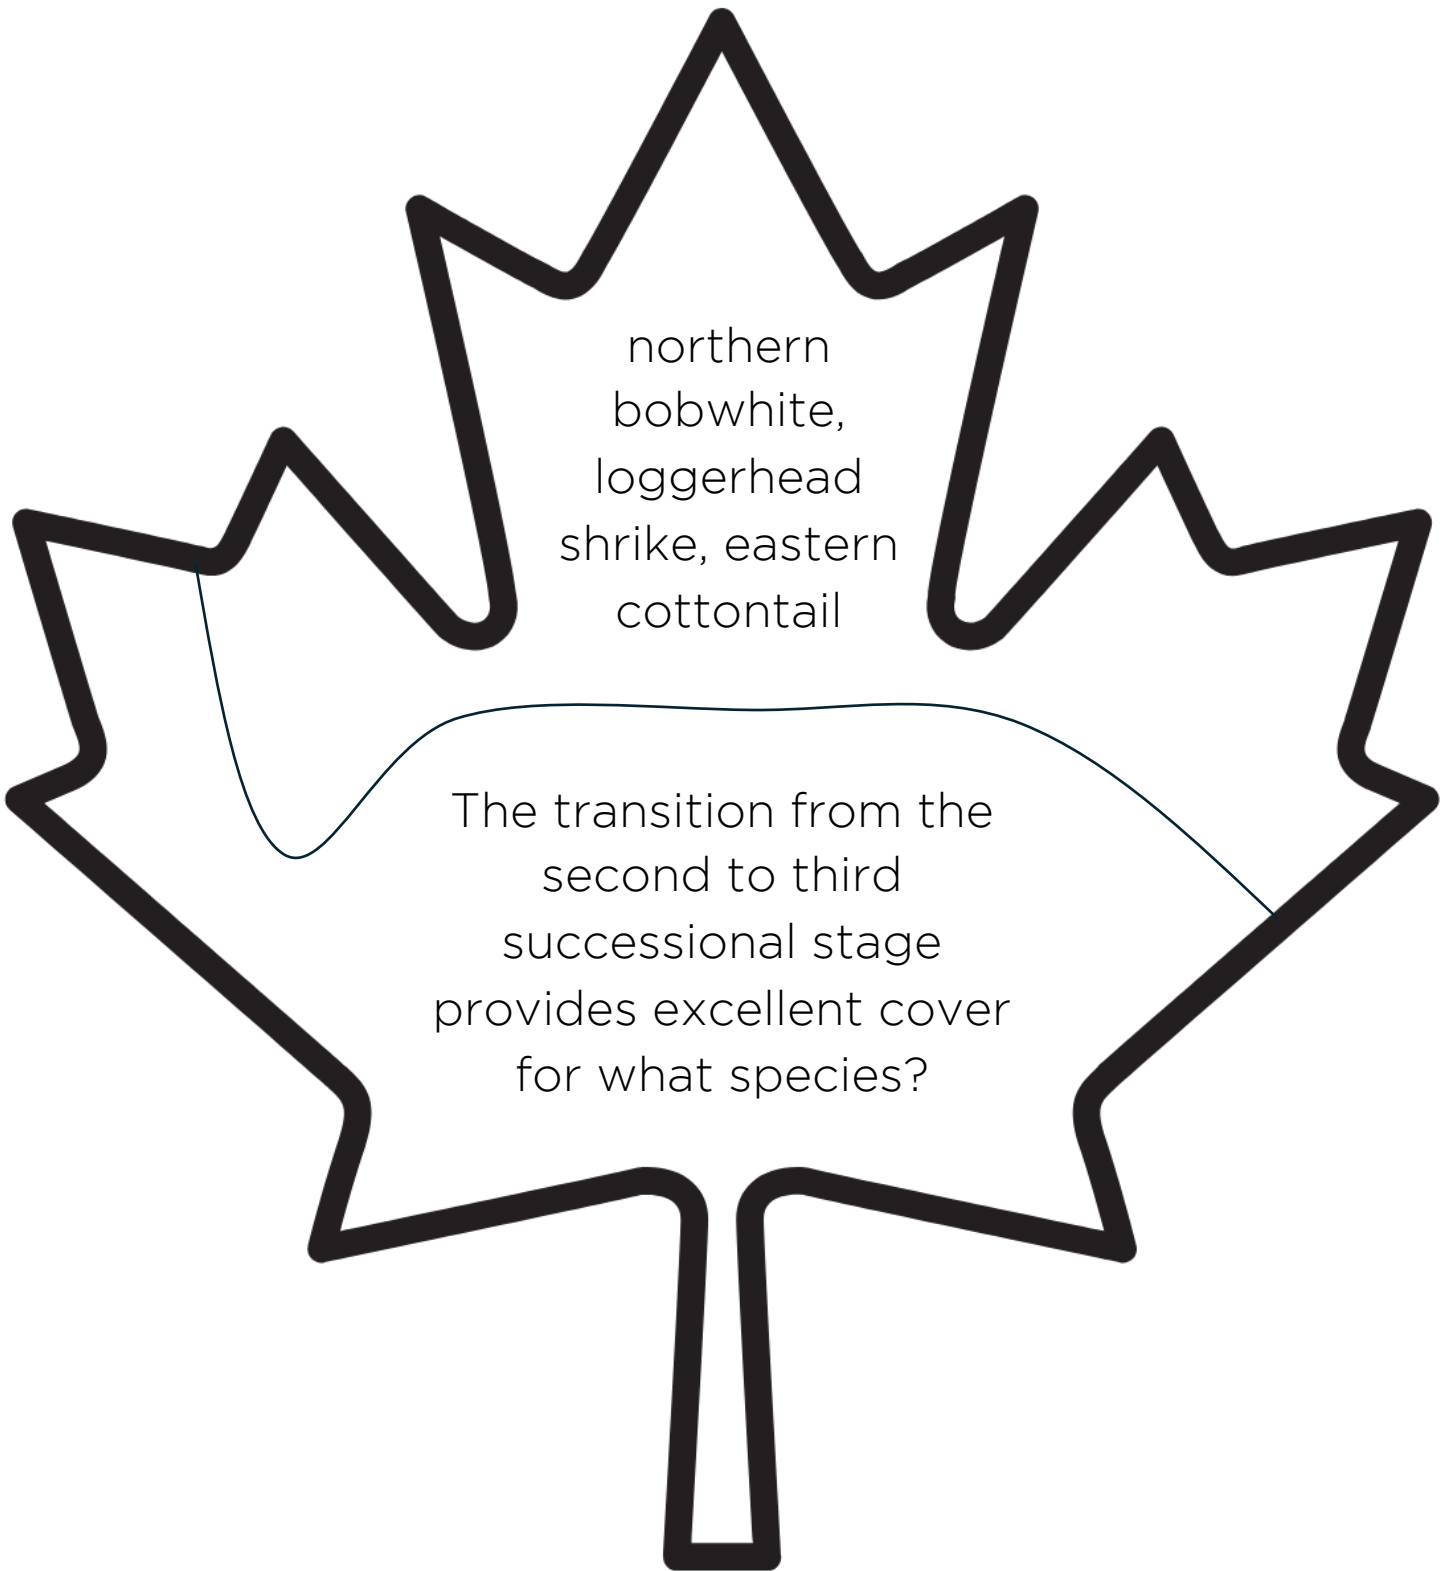

Answer on page 60

What
represents the
second
succession
stage?

perennial forbs
and grasses

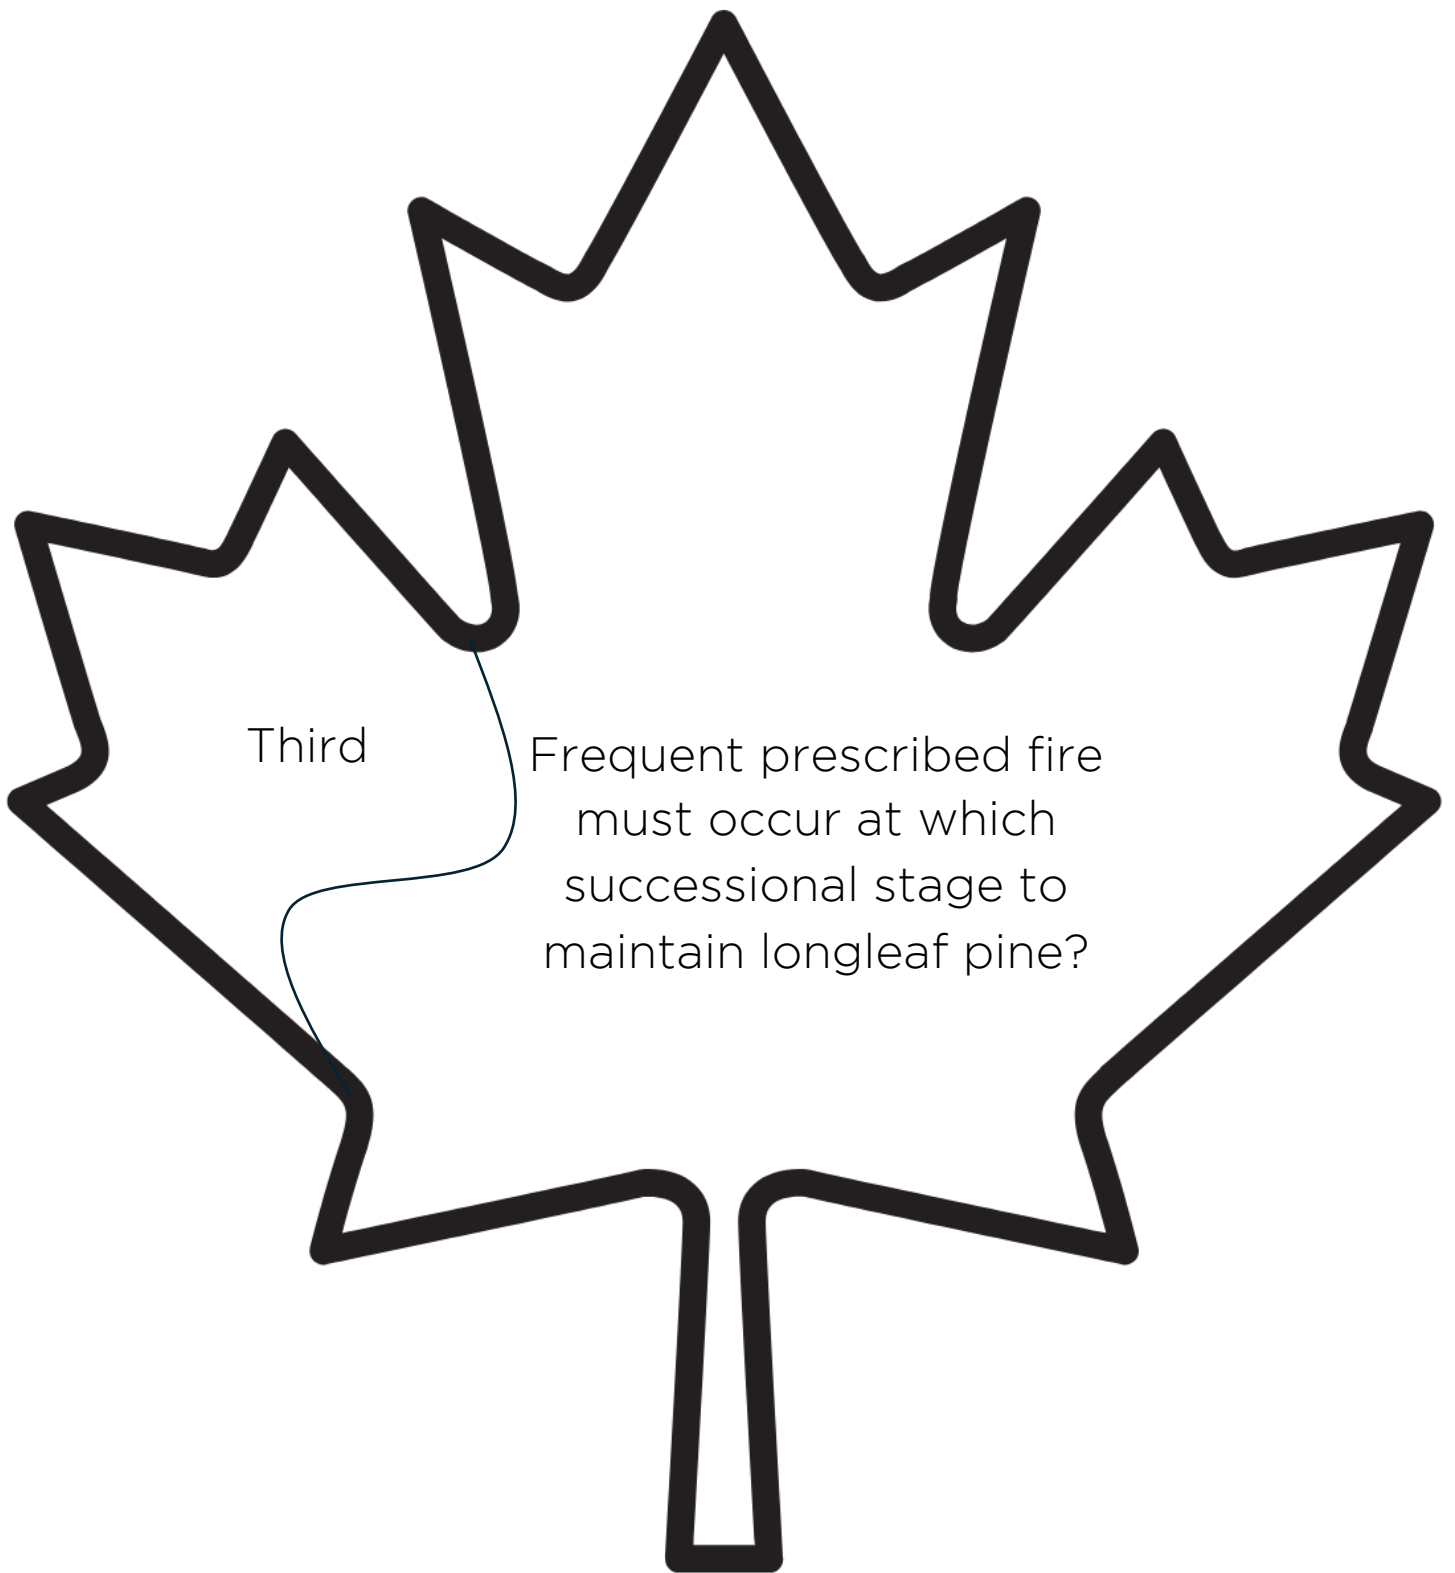

Answer on page 60

northern
bobwhite,
loggerhead
shrike, eastern
cottontail

The transition from the
second to third
successional stage
provides excellent cover
for what species?

Answer on page 60

Third

Frequent prescribed fire must occur at which successional stage to maintain longleaf pine?

Answer on page 60

Fourth

Mixed hardwood forest dominated by various oaks, hickories, maples, and sweetgum represent what successional stage?

Answer on page 60
