

Maritime Forest Ecology Journal Questions

1. How does a marsh eventually develop into a climax maritime forest?
2. What is one example of a plant that you would find in a climax maritime forest that might not be in the transition community, and why?
3. Name two ways a fallen log could benefit a maritime forest.
4. How did Native Americans use two of the plants you saw on the trail?
5. Who are the F.B.I. of the maritime forest and why are they important?
