Digital Divide Index Score

2017 DIGITAL DIVIDE PROFILE

Garrett, Maryland

The digital divide index score (DDI) ranges between 0 and 100, where a lower score indicates a lower divide. The infrastructure adoption score and the socioeconomic score both in a 0 to 100 range as well contribute to the overall DDI. Listed below each score are the indicators used.

Infrastructure/Adoption Score

If this score is much higher than the socioeconomic score, efforts should be made to upgrade the broadband infrastructure.

0.0%

of people without access to fixed broadband of at least 25 Mbps down and 3 Mbps up

26.2%

of households with no internet access

19.5%

of households without a computing device

664.689

average maximum advertised download speed in Mbps

599,249

average maximum advertised upload speed in Mbps

38.17

Socioeconomic Score

If this score is much higher than the infrastructure/adoption score, efforts should be made to focus on digital literacy and exposing residents to the benefits of the technology.

20.8%

population ages 65 and older

10.9%

ages 25 and older with less than a high school degree

11.4%

of individuals in poverty

15.4%

noninstitutionalized civilian population with a disability
