

From the Mountains to the Sea

As one of the nation's largest providers of residential environmental education, the Georgia 4-H Environmental Education Program provides opportunities for high-quality day and overnight educational experiences. Each Spring, thousands of K-12 students attend environmental education camps at Georgia 4-H facilities across the state. They hold snakes, hike through creeks and marshes, visit historic sites and enjoy nature; all with a goal of learning about the environment. Since the COVID-19 outbreak has public schools closed, school buses parked and Georgians sheltered in place, the Georgia 4-H Environmental Education Program is now being offered virtually. To continue reaching students, Georgia 4-H centers have created "From the Mountains to the Sea", an online educational series.

Expedition Dates & Times

Solo Expedition (begin your flight anytime)

Grades

K – 12th

Materials Needed

No materials needed

Launch Sequence (Where to Access)
