

Pollution Solutions Journal Questions

1. What are the forms of pollution you discussed in class? Give at least one example for each.

2. What are the three R's for reducing waste? Give an example for how each can be used.

3. What does it mean for something to be "biodegradable"?

4. Describe the benefits of composting.

5. Name three things you can do every day to help reduce your carbon footprint.

6. How can factories help to reduce their total pollution output?

7. What is the difference between bioaccumulation and biomagnification?

8. The Great Pacific Garbage Patch is an area in the Pacific Ocean that has 1.8 trillion pieces of trash (or more) that was brought there by a series of currents. How do you think we can ensure that the patch does not get any larger?

9. How can you help limit the amount of pollution that is being emitted in your community? Create a step by step plan of how you would do this.

10. When you were out picking up trash, did your group find a lot? How did that make you feel?
