

Safety Tips for Virtual Learning

While Video Conferencing:

*Don't put unnecessary personal information in the user profile of apps

Make sure apps are up-to-date with newest version

Remind child to never accept instant messages, phone calls, or share files from anyone they don't know

Remind them that chat functions and message boards are monitored by school and to use appropriately

Protecting Home Network:

*Keep anti-virus program updated daily

*If you use wireless router, make sure:

- it's unidentifiable to you or your family
- it has secure password created by you; not factory default

Securing On-line Chats and Chatrooms (for outside of class collaborations or communication):

*Advise kids to never give out personal information about anyone

*Kids should think before answering private messages

*Remind them some people might not be who they think they are; report anything that seems odd or makes them uncomfortable

*Don't use real names in chatrooms

*Parents should monitor
