

Salt Marsh Ecology Journal Questions

1. What are the two main types of plankton? List at least two differences.
2. What is a living shoreline? What does it do for the 4-H center and the animals that live in the marsh?
3. Draw a salt marsh and label at least four zones.
4. Give three reasons why a salt marsh is important.

5. What are some ways animals and plants have adapted to living in the marsh?

6. How do periwinkle snails respond to the tides?

7. Oysters are considered to be a keystone species of the marsh. Why are they so important?

8. What was your favorite activity you did at the marsh and why?

Making the best better!
