

Tips for Viewing and Using Fillable PDFs

Save the form to your computer before completing it

We suggest that you first download the PDF form to your computer or network drive, and then open it with Adobe Reader or Foxit PhantomPDF and fill it in. You can either type information directly into each field, or copy and paste text. The font is preselected and cannot be changed. You can only type regular text (upper and lower cases); the system will not accept underlined text, bold or italics, script or formulas, curved or slanted apostrophes, double quotation marks or long dashes. You can save your data and re-open the file later to modify or enter additional information.

The screenshot shows a PDF viewer interface. The title bar at the top reads 'ent-Spotlight-Application.pdf'. The page number '1 / 5' is displayed in the top left of the document area. In the top right corner, there are icons for refresh, download (circled in blue), and print. The document content includes the following text:
