

GEORGIA 4-H

FROM THE MOUNTAINS TO THE SEA: 4-H ENVIRONMENTAL EDUCATION

Visit any (or all) of our 4-H Centers!

In Person Offerings: Our facilities are open, with some changes in place for the safety of our guests and staff. As always, the 4-H Environmental Education Programs utilizes the outdoors as a classroom without walls to provide outstanding learning experiences for K-12 grade students in locations from the mountains to the sea.

Virtual Offerings: We are pleased to also offer a select number of virtual field trip options. One hour programs are \$50, during which our educators can join in your classroom virtually to highlight Georgia's amazing classroom from the mountains to the sea.

Georgia 4-H Environmental Education provided a spring and summer series of pre-recorded program offerings, all of which are still available free of charge. The fifty different episodes are approximately 5-20 minutes each and cover a range of topics including astronomy, beaches, birds, insects, reptiles, streams, wildlife, and more. Visit georgia4h.org/ee/archive for a complete list and links to each episode.
