

## Wetland Monitoring Journal Questions

1. Name three ways wetlands help the ecosystem.
2. When testing the water from the marsh, what were four tests you completed?
3. Why is the amount of dissolved oxygen important?
4. Is the water in the marsh fresh, salt, or brackish? Explain your answer.

5. Based on your findings today, is the salt marsh healthy? Give reasons for your answer.

6. Why is it important to continually monitor our wetlands?

7. What are the steps of the scientific method?

8. During the “make your own filter” activity, what combination of natural things worked best to filter the dirty water?
